POWER TOOL ACCESSORIES

Accessories and consumables for drilling, driving, cutting, sanding, and abrasive applications.

POWER TOOL ACCESSORIES

Professional power tools depend on the correct accessories to deliver efficient, accurate, and repeatable results. Sigma Traders USA organizes sourcing across key accessory families used by contractors, workshops, retailers, facilities teams, and qualified resellers. The category focuses on the accessory itself rather than cordless or corded power tools. Quotations are structured around application, material, dimensions, shank or interface, quantity, packaging, and documented product compatibility where relevant.

PRIMARY AUDIENCES	ADDITIONAL ELIGIBLE AUDIENCES
• Construction Contractors & Skilled Trades • Independent Hardware Retailers & Specialty Dealers	• Facilities, Maintenance & Commercial Buyers • Qualified Ecommerce & Marketplace Resellers

Also available for qualified business accounts, subject to product and channel eligibility.

POWER TOOL ACCESSORIES

Drill Bits

Drill bits for wood, metal, masonry, concrete, and general-purpose drilling. Requirements may include bit type, diameter, working length, total length, shank, material, coating, point design, and set configuration.

Impact-Driver Bits

Driver bits, nut setters, bit holders, and related impact-rated accessories for fastening and installation. Product requests may be organized by drive type, tip size, length, set composition, and intended tool interface.

Hole Saws

Hole saws, arbors, pilot bits, and sets for cutting openings in wood, metal, plastic, and other supported materials. Quotation details should include diameter, cutting depth, arbor requirements, and intended material.

Circular and Reciprocating Saw Blades

Blades for cutting wood, metal, demolition materials, composites, and other approved applications. Selection may depend on blade diameter or length, arbor, tooth count, kerf, material, and intended cut.

PRODUCT FAMILIES

POWER TOOL ACCESSORIES

Oscillating-Tool Blades

Blades and attachments for plunge cutting, flush cutting, scraping, grout removal, and detail work. Interface and compatibility must be confirmed at the individual product level.

Sanding and Abrasive Accessories

Sanding discs, sheets, belts, pads, backing accessories, and related abrasive products. Requirements may include grit, diameter, attachment method, backing, material, and application.

Cutting and Grinding Accessories

Cut-off wheels, grinding wheels, flap discs, and related accessories for metalworking, fabrication, maintenance, and construction applications. Product-level safety, dimensions, speed ratings, and tool suitability must be confirmed.

TYPICAL APPLICATIONS

- Drilling and anchoring
- Fastener driving and installation
- Wood and metal cutting
- Demolition and renovation
- Hole preparation
- Surface preparation and finishing
- Grinding and material removal
- Workshop and facility maintenance

Information Helpful for a Quote

- Accessory type - Manufacturer part number, when known - Dimensions or size range - Shank, arbor, or interface - Intended material and application - Tool platform or compatibility requirement, where relevant - Individual item or set configuration - Estimated quantity - Destination and delivery timeframe

- Accessory type
